

IMPACTION (+CA) AND IMPACTION (+K) IN CUCUMBER

VARIETY: Edona

DATE: September 2006

N° EVALUATIONS: 2

CONDUCTED BY: GEMAS

Internode length (cm)

TREATMENT	I. (+ CA)	I. (+K)	REF	UNTREATED
10TH INTERNODE	1,0	0,7	0,3	0,0
18TH INTERNODE	1,3	1,6	1,0	0,0

EFFECT OF IMPACTION (+CA) AND IMPACTION (+K) IN THE REDUCTION OF THE DISTANCE BETWEEN NODES IN A CUCUMBER CROP

Evaluation of the efficacy of Impaction (+Ca) and Impaction (+K) in the distance between nodes in a cucumber crop vs the application of Nitrates

N° APPLICATIONS: 5

Dose rate:
Impaction (+Ca) + Reference fertilizer: 5 Lt/Ha
Impaction (+K) + Reference fertilizer: 5 Lt/Ha
Reference fertilizer: Standar application rates
Untreated (water)

LOCATION:

Los Palacios, Sevilla (Spain)

COMMENT:

Impaction (+Ca) and Impaction (+K) decreased in a significant way the distance between nodes on node 10th and 18th

Internode length (cm)
