

## Speedo Saxon

7-19-0 + Mg 0.6%, B 0.1%, Cu 0.1%, Co 0.005%, Fe 0.3%, Mn 0.3%, Mo 0.005%, Zn 0.3% plus Plant Impact Speedo chemistry

Fast acting Liquid concentrate fertiliser

Even in ideal conditions soil nutrients can become 'locked up' and unavailable to the plants roots. In adverse conditions growth, yield and quality is reduced by poor soil conditions, drought, salinity, and pest and disease damage. Speedo Saxon contains high levels of all nutrients in highly available forms to feed the plant when the roots cannot. Containing Plant Impacts patent protected Speedo™ chemistry Speedo Saxon sets a new benchmark for foliar fertiliser performance.

Benefits of Speedo Saxon include:

- n Fast acting patent protected SPEEDO chemistry
- n Increased yield - independently proven
- n Earlier maturity through SPEEDO chemistry
- n Corrects deficiencies quickly

Speedo Saxon effectively reduces transient deficiencies during vigorous growth, flower and fruit development – allowing the plant to achieve its maximum potential.

Speedo Saxon has shown consistently good results on many crops worldwide in an international field trial programme.

### Recommendations for application:

Foliar application: 2-3lts / ha as foliar spray in minimum 100lts water. Or use a 0.5% spray solution and spray till run-off. Avoid spraying during direct sun.

#### CROP

Fruit trees, vines and hops

Bananas

Potatoes

Cucumber / Melon

Vegetables

Tomato/Pepper/Eggplant

Strawberry/Soft Fruit

Citrus

Ornamentals

#### TIMING

15-20 day intervals from leaf emerge until harvest

15-20 day intervals from flowering to harvest

15-20 day intervals from 5-leaf stage

15-20 day intervals from 4-leaf stage

15-20 day intervals from 3-leaf stage

15 day intervals from 4-leaf stage till harvest

15 - 20 day intervals from leaf emergence

Following each leaf flush

Apply weekly during stress conditions
